pavoljurik.design · linkedin.com/in/pavoljurik

I bring 10+ years of experience across UX design, product management and business analysis, alongside hands-on AI-assisted development. My work spans insurance platforms, streaming services, telecom and AI applications. I translate complex requirements into clear workflows and working products, collaborating with business stakeholders and developers through implementation.

CORE CAPABILITIES

Product development and roadmap ownership · Enterprise UX and interaction design · User interviews, concept testing and prototyping · Design systems · Stakeholder collaboration · Developer and agency management · AI-assisted coding · RAG applications and agent workflows

SELECTED PRODUCT WORK

Čistý kout — AI-driven cleaning-services marketplace

In production · Real users

A fully AI-driven project connecting households with cleaning professionals. Drive product and UX work across discovery, AI-assisted requests, provider profiles, bookings and service operations. The latest Variant D redesign extends a consistent experience across the public site and application.

Regulace AI — Regulatory Q&A and monitoring

May 2026–present · Deployed; active development

Built an application connecting regulatory-source monitoring with AI-assisted content analysis and retrieval-based answers. Implemented citation checks, evidence-based refusal behavior and audit records. Answer-quality evaluation remains incomplete.

FastAPI · React · Supabase · Qdrant · OpenSearch

HiFiveUI / Figma Agent Bridge — AI design tools

Work on tools connecting AI agents with Figma, reusable components, design variables and interactive prototypes. Develop workflows linking structured design work with AI-assisted product building.

Private banking — Mobile strategy and concept

Worked in a three-designer team on an approved concept centred on personal-banker contact, request tracking and documents. Refined the direction through interviews and testing. Confidential client; published visuals are illustrative.

Smart Blocks — Small PowerPoint side project

Built a simple add-in with reusable slide blocks and AI image generation. In use by Meonzi consultants.

OpenClaw — Agent workflows for content and development

Configured an OpenClaw-based agent setup for generating blog articles and other content, running a video pipeline, and carrying out coding and testing tasks.

PROFESSIONAL EXPERIENCE

Meonzi / Trask — Senior UX Designer

February 2024–present · Main engagement: VIG — Kooperativa / ČPP

- Design core insurance workflows for contract management, insurance calculations, tasks and document handling.
- Translate business requirements into user journeys, concepts, prototypes and UI designs for implementation.
- Contribute to a custom design system with designers, business analysts, domain experts, developers and business stakeholders.
- Resolve implementation questions with developers and help test the implemented experience; use AI in design, prototyping and development.

Deloitte — Senior Project Associate, UX Designer & Consultant

July 2023–February 2024

- Delivered UX/CX consulting within client product teams, primarily in financial services.
- Designed customer-facing and internal experiences for digitalization and business-process redesign initiatives.
- Contributed to large-scale design systems in complex enterprise environments.

TV Prima / CNN Prima News — Product Manager & UX Designer

July 2016–July 2023

- Worked in the internal online product team on video-on-demand applications and content websites.
- Contributed to Prima+ with a focus on HbbTV and Smart TV. Designed a TV-app version, tested early concepts and created an interactive high-fidelity Figma prototype.
- Helped introduce UX research, testing and prototyping into everyday product work and supported adoption of design tools including Figma.

EARLIER PRODUCT AND LEADERSHIP EXPERIENCE

CreativeDock — Product Leader. Led an early-stage fintech venture offering alternative payment methods to e-commerce stores. Owned product development, business results and the roadmap; managed developers, an external marketing agency, and client and partner communication.

O2 Czech Republic. Product management for the e-commerce portal and customer self-service.

T-Mobile Czech Republic. Team leader in business processes.

Additional client work: Amundi Czech Republic and Orange Slovensko. Earlier work included front-end design and development, SEO and conversion optimization across agencies, startups and corporate teams.

EDUCATION

University of Economics, Slovakia — Faculty of Business Management

Completed a five-year university program.
